QUICK START

ICEcore

The term "ICEcore" on this sheet applies to all versions of ICEcore unless otherwise noted. For more information about ICEcore features, refer to the ICEcore User Guide and online help.

EXPLORE THE WELCOME PORTLET

When you log into ICEcore for the first time, you will see a *Welcome* portlet that links to the ICEcore manuals and a getting started web page. If you remove this portlet, you can get it back by clicking *Add Content* at the top of your screen and selecting *Welcome* from the ICEcore menu.

FIND YOUR WAY AROUND WITH THE NAVIGATOR

The *Navigator* is your navigation center. Using the tools here, you can navigate to anyplace that you need to go:

My Workspace - Click the *My Workspace* icon  to open your personal workspace, which contains your *Profile*, your folders, your *Guestbook*, and other accessories.

Favorites - Click the *Favorites* icon  to open the *Favorites* menu, where you can add links to folders that you access frequently. From this menu, you can bookmark the current folder or workspace, navigate to any of the places that you book-marked previously, and edit your bookmark list. See *Use Favorites for Places You Visit Often* below.

Quick Search - Enter any type of search term in the *Quick search* box and click  to display a *Quick search* folder with the search results. For more search options, click *Advanced*.

Find people, Find Places, Find tags - Use these boxes to search for a user's personal workspace, for a workspaces and folders, or for items with tags. (See Terminology below.)

Workspace Tree - Click the plus sign to the left of the workspace tree icon  to expand the workspace tree. The tree has three main branches: *Global Workspaces*, *Personal Workspaces* and *Team Workspaces*. Expand one of these categories and "drill down" until you get to the workspace you need. To collapse a branch, click the minus sign to the left of the branch: .

Help - Click the *Help* icon  to enter *Help* mode, then click on one of the new help icons  that appear to access context-sensitive help. To exit *Help* mode, click anywhere except on another *Help* icon.

SET UP YOUR BUDDY LIST

Your *Buddy List* helps you keep track of people that you'll need to contact frequently. Add people to your buddy list right away to make it easy to get in touch with them.

- 1 Click *Add buddies*.
- 2 Start typing a name in either the *Users* or the *Groups* box. A drop-down list displays matching names. Select a name and click *Apply* to add the name to your list.
- 3 Add as many names as you want, clicking *Apply* after each one.
- 4 To remove a name, click the x icon after the name; then click *Apply*.
- 5 When you finish, click *Close*. The new names are displayed in the buddy list.

Novell®

Tips for Using Your Buddy List:

- ♦ An icon to the left of a buddy name indicates presence.
 *Online Away Offline Unknown*
- ♦ To communicate with a buddy, click his or her presence icon and select an option from the menu that appears.
- ♦ To update presence information, click *Refresh*.
- ♦ To view a buddy's contact information or to navigate to his or her workspace, click the buddy's name.

ADD INFO AND A PHOTO TO YOUR PROFILE

- 1 In the Navigator, click  *My workspace* to go to your personal workspace.
- 2 On the menu bar for your workspace, click *Modify Profile*.
- 3 In the *Modify Profile* window, fill in any missing information. This information is visible to others and is also used by ICEcore and Zon to contact you by phone, e-mail, or IM.
- 4 Add a picture. Click *Browse...* to look for a graphics file on your computer; then click *OK*. The picture is displayed in the *Photo* box of your profile.
- 5 Click  or *Home* to return to the initial page.

Tips for Adding Photos to Your Profile:

- ♦ You can add as many images as you like, but you must add them one-by-one.
- ♦ Thumbnails of all of your images are displayed beneath your contact information. As you move the mouse over a thumbnail, the image is displayed in the Photo box. To replace the original image in the *Photo* box with one of your other images, click on the image thumbnail.
- ♦ To add a picture from the Internet, first save it to your computer.
- ♦ To remove an image from your profile, click *Modify profile*. Select the images to be deleted by clicking their check boxes. Then click *OK*.

START A NEW BLOG IN YOUR WORKSPACE

- 1 Click  *My workspace* to display your personal workspace.
- 2 On the workspace menu bar, click *Manage this workspace*.
- 3 Select the *Add new folder* menu item. A form for adding a folder appears.
- 4 In the *Title* field, enter a title for your new blog (your workspace already a default blog named "*Blog*").
- 5 Under *Select a template*, choose *Blog folder*.
- 6 Click *OK* to create the blog.

To Add Your First Blog Entry:

- 1 On the menu bar above the blog calendar, click *New* and select the *Blog Entry* menu item.
- 2 In the *Blog Entry* form that appears, type in the title of your blog entry in the *Title* box.
- 3 In the *Description* box, type in the content of your blog entry (use the formatting tools in the editor to format your entry).
- 4 Under *Attachments*, you can select a file to attach to this blog entry.
- 5 Click *OK* to add the entry to your blog.

To Add a Comment to a Blog Entry:

- 1 Click *Add Comment* beneath the blog entry.
- 2 In the form that appears, type in the title of your blog comment in the *Title* box.
- 3 Type in your comment in the *Description* box.
- 4 Click *OK*. Your comment appears below the blog entry.

WORK WITH TEAMS

ICEcore was designed for teamwork. Create a team workspace; then add folders and a team to the workspace. Once your team is set up, you can communicate easily with your team members.

To Create a Team Workspace:

- 1 In the *Navigator*, click on the *Team Workspaces* branch of the workspace tree.
- 2 Under the *Team Workspaces* tab, click *Add a Team Workspace*.
- 3 In the *Workspace Title* field, type in the name for the new workspace.
- 4 Under *Team Members*, select any *Users* and *Groups* you want to add as team members to this workspace. Type a character or two into either field and select the user or group you are want to add from the drop-down list that appears.
- 5 Under *Workspace Folders*, select the types of folders you want to include in this workspace.
- 6 To announce the creation of this workspace, select the *Announce the creation of this workspace to the team* option and type in the message you want to use.
- 7 Click *OK*. The new workspace is added to *Teams*.

To Add Members to a Team for a Workspace or Folder:

- 1 Under the tab for the new workspace, click *Access Control*.
- 2 Change the setting for *Inherit role membership from the parent folder or workspace* to *No* and click *Apply*.
- 3 In the *Roles* table, click *Add a User* or *Add a Group* to find users or groups you want to add to the team, begin typing the user or group name and select the name from the drop-down list that appears, and then select *Team Member* for that user or group.
- 4 When you have finished adding members, click *Save changes*, then *Close*.

To View Team Members:

- 1 Select the workspace or folder with which the team is associated.
- 2 On the menu bar, click *Team*.
- 3 Select the *Show Team Membership* menu item.

WORKING WITH FAVORITES

Use *Favorites* for places you visit often.

To Add a Place to Favorites:

- 1 Navigate to the workspace or folder that you want to add.
- 2 Click  to open the *Favorites* menu.
- 3 Select the *Add This Place* menu item. The workspace or folder is added at the end of the *Favorites* list.

TAKE ADVANTAGE OF TAGGING

Tagging is a powerful way to discover, evaluate, and retrieve information. Users assign keywords, called tags, to workspaces, folders, and entries. Tags are designated as either community (shared) or personal (private). You can then use tags in searches. The search engine also uses tags to rank search results by relevance.

Click the *Tags* icon  to add both *Personal* and *Community* tags to an item.

For more information on tags, see the ICEcore User Guide.

ADVANCED SEARCH

Use Advanced Search to find the specific information you are looking for without having to navigate through multiple workspaces and folders.

To Perform an Advanced Search:

- 1 In the Search section, click *Advanced*. The *Advanced Search* window appears.
- 2 In the *Text* field, type in text related to the item for which you are searching.
- 3 If you know who created (added) the item in ICEcore, type the name into the *Authors* field.
- 4 If you know that the information is tagged, type the relevant tag into the *Tags* field.
- 5 Under *Places*, select the option you want to use:
 - ♦ Use the *Search All Sub Places* option to search all folders and workspaces
 - ♦ Use the workspace tree options to select the specific areas to search:
 - a. Click the + arrow next to *Workspace*.
 - b. Select the areas you want to search (drill further down in any area if you want).
- 6 Next to *List Results*, use the drop-down lists to select the number of items and the number of words (per item) that you want to retrieve for your search.
- 7 Click *Search*.

The search results appear in a list below the *Advance Search* area. To the left information about the top ranked places, people and tags associated with you search is displayed.

To Use Additional Advanced Search Options:

- 1 In the Search section, click *Advanced*. The *Advanced Search* window appears.
- 2 In the top-right corner of the *Advanced Search* area, click *More Options*.
- 3 The following options are available:
 - ♦ *Authors* — This option allows you to enter one or more author names.
 - ♦ *Tags* — This option allows you to enter one or more tag names.
 - ♦ *Workflow* — This option allows you to enter one or more workflows.
 - ♦ *Entry Attributes* — This option allows you to enter one or more entry types.
 - ♦ *Last Activity in Days* — This option allows you to limit the search to items that have had activity within a set number of days.
 - ♦ *Creation Dates* — This option allows you to limit the search to items created within one or more date ranges.
 - ♦ *Modification Dates* — This option allows you to limit the search to items modified within one or more date ranges.
 - ♦ *Item Type* — This option allows you to limit the search to one or more item types.

NOTE: Click More Criteria to enter additional search criteria for an option.

NOTE: Type in a few characters and most fields generates a drop-down list of choices.

TERMINOLOGY

buddy list - A list of people that you contact frequently.

entry - An item that is contained in a folder.

folder - A container for entries and other folders. Each folder has a type, such as *blog*, *wiki*, or *calendar*.

presence - The state of being connected to a communications service and available for communication. Presence information is indicated by status icons.

workspace - A container for folders and other workspaces.
